SAINT ANDREW'S CHRISTIAN CHURCH
1996 – Constructed 1999 – Olathe, Kansas
R.G.B.C. (RGB Consulting- Black, Pontikis, Burda)

Design of a complex of buildings, which includes sanctuary, offices, classrooms and exterior trellises and gardens. The sanctuary structure is a series of exposed concrete lattice frame trusses spanning 20 meters. Entry building and classrooms are prototypical construction system utilising gunnite and straw bales. The building was constructed in two phases. The designers were also the construction managers of the first phase of the building.
